

**Resource Adequacy Senior Task Force
Monthly Progress Report
9/19/2022**

Target Completion

The expected completion date of all work for the RASTF is Q4 2023. A [RASTF Dashboard](#) is available for stakeholders.

Progress Update

Key Work Activity #1 – Procurement of Clean Resource Attributes

The RASTF voted in support of an issue charge to create the Clean Attribute Procurement Senior Task Force. The MRC endorsed the issue charge at the April meeting. The first meeting of the Clean Attribute Senior Task Force was held on June 3, 2022.

Key Work Activity #2 – Reliability Risks and Drivers

Matrix – Stakeholders are in the solution options phase of the CBIR process.

Key Work Activity #3 – Procurement Metric and Level

Matrix – Stakeholders are in the solution options phase of the CBIR process.

Key Work Activity #4 – Performance Assessment

Matrix – Stakeholders are in the solution options phase of the CBIR process.

Key Work Activity #5 - Qualification and Accreditation

Matrix – Stakeholders are in the solution options phase of the CBIR process.

Key Work Activity #6 – Obligations of Capacity Resources

Matrix – Stakeholders are in the solution options phase of the CBIR process.

Key Work Activity #8 - Remaining Design Seasonal Resource Adequacy Construct

Education on Seasonal Capacity has begun and stakeholder presented perspectives on this topic.

Key Work Activity #9 – Supply-side Market Power Mitigation Rules

A narrow package for Market Seller Offer Cap (MSOC) failed at the July MRC. Two broader MSOC packages were endorsed by the RASTF in July. A first read was presented at the August MRC and a vote is expected at the September MRC.

Action Requested (if necessary)

The RASTF will have opportunities for stakeholders to present high-level perspectives on solution options for capacity market reform at the September and October meetings. PJM provided perspectives at the RASTF meeting on August 31.

Stakeholders may present solution options in context of how those options relate to various key work activities. Presentations may cover all or parts of the RASTF key work activities and seasonal capacity and should focus on design objectives and solution options. We are still in the solution options phase of CBIR. Therefore, presentations should not be proposals or packages at this time.

Stakeholders interested in presenting should contact David.Anders@pjm.com and Alexandra.Scheirer@pjm.com.
