

Performance Impact of multi-schedule model in Market Clearing Engine (MCE) in nGEM Enhanced Combined Cycle (ECC) and Energy Storage Resource (ESR) models Monthly Progress Report

6/19/23

1. [Performance Impact of multi-schedule model in Market Clearing Engine \(MCE\) in nGEM Enhanced Combined Cycle \(ECC\) and Energy Storage Resource \(ESR\) models](#)

Issue Status

The Performance Impact of the Multi-schedule model in the MCE will be providing additional education and reviewing packages at its next special session on June 27.

Target Completion

August 2023

Progress Update

The first three special sessions reviewed education on status quo, and solicited interests, design components, solution options, and packages. The remaining special session on 6/27 will provide additional education and hone packages for a first read at the MIC on July 12.

Action Requested (if necessary)

Stakeholders should provide packages in advance of the June 27 meeting.
