

# Resource Tracker

Unit Onboarding Enhancements  
Christine Franks  
Dave Miscavage

The Resource Tracker tool supports the maintenance of ownership information and provides the Generation Owner a single view of generator ownership information as recorded across various PJM applications. Access is granted through Account Manager.

- PJM Interconnection Project Manager submits new generator into PJM's MDM system
- Client Management Project team downloads Excel sheet from the system with generator information required for onboarding and sends to member company
- Member company populates the data needed and emails the Excel file back to PJM
- Client Management Project team manually enters the information in the MDM tool

- With new functionality added to PJM's Resource Tracker tool, PJM members will now access a form through Resource Tracker to enter onboarding details.
- Data required is not changing, only the method used to collect it.
- This new functionality is currently only accessible to PJM members and will require read/ write access to Resource Tracker.
- While working with PJM Interconnection Project manager, owners are able to specify member/agent who will be the submitter.

- Client Management Project team will send a link to the specified member company contact to begin filling out the form details.
- Member contact will submit completed form (through the Resource Tracker Tool) to the Client Management Project team for review.
- Once review is complete and data is approved this process is complete
- As with the current process, Member will receive email updates including Markets Gateway and Power Meter set up confirmations

Application will be live in train as of 10/30 and production 11/13

A demo is planned for the 11/16 Tech Change Forum

- Interconnection Form Information
- Generator Summary
- Network Bus Model
- Membership, Legal, and Administrative
- Generator Physical Parameters
- Ancillary Services Information
- Real-time Metering Information
- Dispatching Company Information
- Member Training Information
- Station Service Agreement
- Fuel Cost Policy / MIRA
- Energy Market Model Information
- Capacity Market Information
- PJM Tools Information
