

BOUNDLESS ENERGYSM

AEP FERC 715 Update

Presented to PJM PC

April 30, 2024

BOUNDLESS ENERGYSM

Summary of Changes

- Generation deliverability analysis was not previously required to be studied for the sub-transmission (<100 kV) system.
- The 2024 FERC 715 Part 4 update now includes this analysis as a requirement in accordance with PJM Manual 14b.
- Keeps consistency across RTEP analyses for both baseline and interconnection study purposes.
