Matt Vale
President
NextEra Energy Transmission
700 Universe Blvd.
Juno Beach, FL 33408

Dear Mr. Vale,

Thank you for your correspondence of Dec. 8, 2023 (Dec.8 Letter) concerning PJM's proposed transmission solutions to the 2022 Regional Transmission Expansion Plan Competitive Window 3 (2022 Window 3). We appreciate you acknowledging the challenging and complex task PJM had before it. PJM sought to conduct a robust process that allowed for stakeholder vetting and feedback in a timely manner to allow the selected projects to be sited, designed and built to meet the reliability needs of the system. With this goal in mind, the PJM Board of Managers (PJM Board) deliberated on the 2022 Window 3 proposed solutions, and it has approved the projects PJM staff recommended as reviewed at the Oct. 31 and Dec. 5 Transmission Expansion Advisory Committee (TEAC) meetings.

NextEra's Dec. 8 Letter confirming its commitment to develop a detailed routing study and to work with all of its constituents throughout the siting process is consistent with PJM's understanding and with what you and other project sponsors have communicated throughout. Thank you for sharing your thoughts with me and the PJM Board before the PJM Board's decision.

Sincerely,

Kenneth S. Seiler
Sr. Vice President – Planning
