In a letter dated June 3, 2020, a group of members of the Transmission Owner Sector requested that PJM review the qualifications of several members to participate in their current sectors per Operating Agreement (“OA”) section 8.1.3. PJM worked with each Challenged Member to gather relevant information and to understand their business circumstances before making the following determinations regarding the sector in which they qualify to participate. Sector changes are effective as of October 29, 2020, the day of the Members Committee meeting.
