

DER & Inverter-Based Resources Subcommittee Monthly Progress Report

January 25, 2021

1. Solar-Battery Hybrid Resources

- <https://www.pjm.com/committees-and-groups/issue-tracking/issue-tracking-details.aspx?Issue=%7b3423B18C-59C2-49DD-84C5-AF42B1BA0256%7d>

Issue Status

Solution Proposed

Target Completion

March 31, 2021

Progress Update

- PJM staff reviewed, and acquired stakeholder feedback on different solution options in the hybrid solutions matrix.

Action Requested (if necessary)

- The group is nearing the packaging phase and stakeholders are asked to bring forward any additional solutions options they may have at the next meeting.

2. FERC Order 2222 / DER Aggregation

Issue Status

Education / Ongoing stakeholder discussions

Target Completion

Compliance filing due July 19, 2021

Progress Update

- PJM staff reviewed directives within FERC order 2222 that require close coordination with distribution utilities. PJM Staff also engaged EDCs via questions regarding utility review and operational coordination on FERC order 2222.

- PJM staff introduced few potential solution to certain aspects of FERC order no. 2222 while seeking stakeholder feedback on initial PJM position on topics such as interconnection, size requirements, locational requirements, and the opt-in process for small utilities.

Action Requested (if necessary)

- Stakeholder feedback/presentation on Order 2222. If your organization would like to provide input on the Order or any of the material PJM staff has presented to date, the stakeholder process for developing the compliance filing, and/or recommendations specific to the various directives within the Order, please contact the DIRS facilitation team.
