

Cost Development Subcommittee Monthly Progress Report

April 19, 2021

Fuel Cost Policy

Issue Status

Work is underway for the clarification and refinement of the definitions and calculation methods of incremental costs, no load costs and start up costs. The goal is increasing transparency and consistency in the calculation methods used to develop cost based offers. This issue falls under the MIC Fuel Cost Policy work which can be tracked [here](#).

Target Completion

December, 2021

Progress Update

Work continues on clarification and refinement of cost offer development formulations. Clarifications would be added to M-15 as appropriate.

Action requested (if necessary)

Continued discussions at CDS.
