

# Reactive Power Compensation Task Force Monthly Progress Report

12/3/2021

## 1. Reactive Rate Process

### Issue Status

The second meeting of the Reactive Power Compensation Task Force (RPCTF) was held on Friday, December 3, 2021.

### Target Completion

The expected completion date of this task force is May 2022

### Progress Update

The topics covered at the December 3 meeting included the FERC Notice of Inquiry (Docket No. RM22-2-000, an overviews of the 1) AEP Methodology), 2) generation reactive capability in the PJM planning model and 3) reactive power in EMS.

The deliverables for this task force are as follows:

- A recommendation to the MRC on a proposed market rule change that would establish a rate or market mechanism that would reduce the procedural risks and costs associated with the current existing methodology, if appropriate.
- If the stakeholders determine that current Reactive Power rate mechanism or market mechanism should be modified/created, updates to the PJM Manuals, Operating Agreement and Tariff to reflect the proposed changes.

### Action Requested

- Education materials on how other RTO reactive compensation methodologies.
- A review of PJM's NOI comments.
