

## **Long Term FTR Auction**

### **Issue Charge**

#### ***Problem/Opportunity Statement***

Attached.

#### ***Issue Source***

See Problem Statement.

#### ***Stakeholder Group Assignment***

Market Implementation Committee

#### ***Key Work Activities***

1. Review the current Long Term FTR Auction process, including creation of the model and how outages and transmission projects are included.
2. Discuss the objectives of the Long Term FTR Auction and determine if the current construct allows these goals to be achieved.
3. Develop Long Term FTR Auction rules that meet the defined objectives.
4. Develop clear and transparent rules for the Long Term FTR Auction model including the method used to forecast outages and transmission system projects.
5. Develop implementing Tariff and Manual changes.

#### ***Expected Overall Duration of Work***

Work to address this problem can be completed within six months for implementation in the 2019/2022 Long Term FTR Auction
