

M-13 Emergency Operations Revision 74

Glen Boyle
Markets and Reliability Committee
December 5, 2019

- Manual 13 – Attachment K
 - “Event Investigation Program”
 - Included in M-13 on 5/19/2006
- Describes a common event analysis process for system events impacting PJM, TO and/or GO
- Existing language is outdated and may not reflect current processes
- Update and streamline Attachment K to more closely reflect current process

- “Event Investigation Program” changed to “Event Analysis Process” throughout
- Overall streamlining and clarifying of process
- Removed several definitions
- Removed “Responsibilities” section
- Clarified that members may also conduct their internal event analysis using their internal process

- Minor revisions to report form in Appendix 1
- Removed references to Appendix 4 and 5 (Appendices removed in an earlier revision)
 - NERC Event Analysis Reporting Timelines
 - NERC Event Analysis Event Categories
- Unrelated minor change to section 2.3 Capacity Shortage
 - Minor update to Voltage Reduction Summary Table for PSEG
