

PJM List of Transmission Facilities

MRC Special Session -
Transparency and End of Life
Planning

Aaron Berner

March 24, 2020

- This page is where you would be able to access the listing of facilities IF the individual logged in has CEII access
- At arrow, an additional menu option, “Transmission Facilities”, for those with CEII access leads to a page with spreadsheets for each of the transmission owners zones that shows facilities and the classification of those facilities

The screenshot shows the PJM website interface. At the top, there is a navigation bar with 'Sign In', 'Tools Sign In', and 'Calendar' on the left, and a search bar with 'Go' on the right. Below this is a secondary navigation bar with 'about pjm', 'training', 'committees & groups', 'planning', 'markets & operations', and 'library'. The main content area is titled 'System Operations' and includes a breadcrumb trail: 'Home > Markets & Operations > System Operations'. A left sidebar contains a menu with items like 'Operational Data', 'Data Directory', 'Interregional Data Map', 'PJM Tools', 'Energy Market', 'Capacity Market (RPM)', 'Financial Transmission Rights', 'Ancillary Services', 'Demand Response', 'Billing, Settlements & Credit', 'System Operations', 'Gas-Electric Coordination', 'Synchronous Technology', 'Advanced Technology Pilot Program', and 'Pilot Program'. A blue arrow points to the 'Advanced Technology Pilot Program' link. The main content area has a heading 'System Operations' and a paragraph describing PJM's role in managing the transmission and distribution grid. Below this are sections for 'Generation' and 'Contact PJM'. The 'Contact PJM' section includes a 'Member Community' button, phone numbers (866) 400-8980 and (610) 666-8980, and a 'Member Relations' link. The 'New to System Operations?' section includes a 'Transmission Zones' PDF link (2.45MB).

- Facilities list on PJM shows a help document with information about the types of facilities PJM operates.
- Two categories of concern in this discussion
 - Reliability & Markets
 - Reliability BES
- Transmission Owners may have some lower voltage facilities not on these lists which are covered by the FERC Form 715 – Transmission Owner Criteria
 - These facilities are identified in the individual criteria documents
