

Clean Attribute Procurement Senior Task Force: Final Report & Recommendation to Sunset

Scott Baker, CAPSTF Facilitator

Markets & Reliability Committee

October 18, 2024

- Issue Charge approved at April 2022 MRC
- 14 meetings between June 2022 – Sept 2023
- Extensive discussion and analysis on conceptual market designs associated with clean attribute procurement mechanisms.
 - [Final analysis results](#)
- Three solution packages developed: [matrix](#)
- ***Sunset deferred at October 2023 MRC***

Package A:
Forward Clean Energy Market
(FCEM)

Package B:
Integrated Clean Capacity
Market (ICCM)

Package C:
Minimum Reliability / State
Attribute Auctions

Question	Yes	No	Abstention	Tally	Pass/Fail
Package A	45	65	40	41%	FAIL
Package B	37	75	38	33%	FAIL
Package C	19	89	42	18%	FAIL

- No solution package recommended for further consideration
- Interested states continuing to work on a Forward Energy Attribute Market (FEAM) proposal outside of the PJM stakeholder process
- FEAM Working Group has recommended a market design that is not FERC jurisdictional (rather, CFTC jurisdictional).
 - Should future FERC jurisdictional clean energy market design discussions emerge, recommend a new stakeholder group at that time.
