

# Capacity Performance – Performance Assessment Hour Ramp Rate

Rebecca Stadelmeyer  
Sr. Consultant, Markets  
Operating Committee – Special Session  
January 20, 2016

- During a Performance Assessment Hour, PJM will dispatch resources using the below ramp rate logic
  - PJM will use the resource's faster ramp rate, determined by:
    - Current day ramp rate inputted in Markets Gateway
- OR
- SEEKING  
STAKEHOLDER  
INPUT ON  
OPTIONS
1. Rolling six-month average ramp rates from Markets Gateway
  2. Average ramp rates of previous year's current month from Markets Gateway (If January 20, 2016 then compare to January 2015 monthly average ramp rates)
  3. Rolling 30-day average ramp rates from Markets Gateway
  4. Rolling seven-day average ramp rates from Markets Gateway
- If PJM requires the resource to ramp faster than the initially rate used for dispatch, then the resource may be eligible for a Bonus Credit

# APPENDIX

- On July 9, 2015 PJM submitted its Compliance Filing in accordance with the June 9, 2015 CP FERC Order. However, FERC has not ruled on the Compliance Filing as of yet.
- PJM presented a 'desired' basepoint concept at the December Operating Committee. Stakeholders provided feedback that they had a different view of the Order.
- After the December Operating Committee, PJM reviewed internally and agreed that an online resource's ramp rate should be included when dispatching them during a Performance Assessment Hour.
- On December 22, 2015, PJM submitted an Informational Filing asking FERC to rule on the July 9 Compliance Filing and outstanding rehearing requests and explaining PJM will operate under the accepted language, as clarified in the compliance filings, should FERC not issue an order by June 1.
  - The Compliance Filing does not address the ramp rate concern discussed at the December Operating Committee

- Present a problem statement and Issue Charge focused solely on creating a ramp rate used during a Performance Assessment Hour
  - Stakeholder discussions during January and February OC
  - Additional discussions may be scheduled, if needed
- The inclusion of ramp rate during a PAH will require a Tariff change
  - PJM desires approval by the OC in March
  - PJM must submit Tariff revisions by March 31 to apply by June 1
