

2019 Fall Individual Company Restoration Drills

- Drills were conducted between Sept. 25th and Oct 30th
- There were 10 Members that conducted their drills at their location with PJM Operators in attendance
- There were 14 Members that conducted their drills at PJM on the simulator at the Milford Campus
- All Nuclear plants were supplied off-site power in under the four hour goal except one; only due to issues with the simulator

- A total of 143 company operators participated
- A total of 52 PJM operators participated
- Overall satisfaction rating of 4.6/5.0
- 1560 CE Hours awarded

- Member Company operators participating at PJM
 - Takes awhile getting use to PJM simulator
 - Discussed the ability to see neighboring systems on PJM simulator
 - Would like the drill to span 2 days
 - More Practice on Cross Zonal procedure
 - Appreciated visibility of the effect of load pickup on voltage and frequency
 - Enjoyed working with PJM operators in the room
 - Very effective training

- Member Company operators participating at their own location
 - Discussed off-site power supply to Nuclear plants and critical loads
 - Appreciated practicing their restoration plan on their simulator
 - Liked having PJM operators present/in the room
 - Coordinating with external companies
 - Well organized training to further skills
 - Everything we did was useful: excellent drill

- 2020 Spring will take place May 19th and 20th, following the last week of the Spring System Operator Seminar
- 2020 Fall Drill will take place between September 28th and November 6th, tentative schedule presented at the October and November DTS meetings
