Generating Unit Reactive Capability Verification

- Pre-Winter Review: From October 1 through October 31
- Generation Owners review their unit reactive capabilities in eDART
- Update D-curves as necessary
- Provide acknowledgement via eDART

Cold Weather Preparation Guideline and Checklist

- Provides generators with a guide to prepare units for cold weather operation
- Based on Manual 14-D, Attachment “N”
- Survey in eDART
 - Starting November 1st and ending on December 15th
 - Option of using the PJM or equivalent checklist

Seasonal Fuel Inventory and Emissions Survey

- Required for reliable operations planning purposes
- Focused on fuel supply and delivery details, fuel inventory and emissions limitations
- Enhance PJM situational awareness in preparation for severe weather
- Survey open in eDART early October through mid-November

WEEKLY Fuel Inventory and Supply Data Request

- Required for reliable operations planning purposes and enhanced PJM situational awareness
- Focused on fuel supply and delivery details, and fuel & non-fuel consumable inventory **for coal and oil resources** only (including dual-fuel units)
- A new data request will be issued each Monday, starting October 11 through February 28.
- Each data request will remain open from Monday to the following Sunday.

Generating Facility Minimum Operating Temperature Survey

- Based on joint NERC/FERC report on MISO cold weather event in January 2018 and ERCOT preliminary findings from February 2021
- Focused on specific generating units limitations, such as ambient temperatures
- Survey reopened 6/14/21 to collect additional data for renewable resources and those recently placed in service - analysis is ongoing

PJM no longer facilitating a formal exercise

Generation resources asked to self-schedule for testing

- Day-ahead preferred, real-time acceptable with proper notice to PJM dispatch
- During month of December
- Temperature forecast below 35 degrees
- Informational eDART ticket with cause “Cold Weather Preparation Exercise”
- See Manual 14-D, Section 7.5.1 for details

RF / SERC Winter Prep Webinar

- Joint effort between RF and SERC
- Held on August 24, 2021 – 0900 to 1230
- Preparation for the upcoming winter weather
- In addition to RF & SERC, presentations by many entities including:
 - NERC, MISO, TVA, NAGF, NAES, El Paso Electric

NERC Winter Prep Webinar

- Preparation for the upcoming winter weather, including:
 - Generator failure modes and mechanisms
 - Winter reliability assessment
 - Natural gas and electrical operation coordination considerations
