

Problem/Opportunity Statement

PUBLIC NOTIFICATION STATEMENTS CLARIFICATION

PROBLEM / OPPORTUNITY STATEMENT

After a public notification statement was declared in December of 2022, the procedure was reviewed after the fact for accuracy.

It was determined there was a need to better highlight the urgency of a conservation request, clarify that request is being made of all electricity users, not just residential customers, and provide more specific energy conservation tips.

In addition, PJM has a DOE-417 requirement for reporting when declaring such an event. As such, M-13 was reviewed to better integrate this step with other emergency procedures for better clarity.
