Storage as a Transmission Asset
October 22, 2020

- Results of a non-binding poll on the Solution Package developed in the Planning Committee Special Sessions – Storage as a Transmission Asset
- Poll Open: 10/09/2020 – 10/16/2020
- 184 Total Responses
 - Voting Members - 36
 - Affiliate Members - 145
 - Non-Members - 3

1. Do you support the PJM package proposal to ensure existing planning rules provide sufficient clarity regarding how SATA should be evaluated and incorporated into the RTEP process?

	Count	% of Total
Yes	121	77%
No	37	23%
Abstain	26	n/a

2. Do you support continued discussions, following the conclusion of this phase, to explore the potential for dual use (use of storage as transmission reinforcement as well as allowing market participation) and resulting market process and tool changes?

	Count	% of Total
Yes	142	72%
No	40	27%
Maybe	2	1%

3. Do you support continued discussions, following the conclusion of this phase, to include exploring operational process inputs as well as reviewing the need for potential operations process and tool changes?

	Count	% of Total
Yes	138	75%
No	29	16%
Maybe	17	9%

- Further discussions needed around:
 - Costs (non dual-use)
 - Operation of SATA (non dual-use)
- All aspects of SATA (planning, operations, markets/dual-use) should be considered first.
- Dual-use discussions will need to be thoroughly investigated and not rushed.
