

# Non-Retail BTMG Reporting in Capacity Exchange

Theresa Esterly  
Sr. Lead Engineer, Capacity Market Operations  
Tech Change Forum Special Session  
June 16, 2020

| Action Required  | Deadline   | Who May Be Affected  |
|--|--|--|
| PJM to educate responsible LSEs/EDCs on new NRBTMG screens recently released in Capacity Exchange.                               | <b>June 16, 2020</b><br><b>10:00 -11:30 AM</b><br><b>TCF Special Session</b> | LSEs/EDCs that are responsible to report on NRBTMG located in modeled wholesale area in zone |
| Report and confirm NRBTMG unit data in the DY Reporting & Confirmation screen during the reporting window. Window opens June 15. | <b>July 31, 2020</b>   | LSEs/EDCs that are responsible to report on NRBTMG located in modeled wholesale area in zone |
| Report NRBTMG generation output data in Coincident Peak Hour screen during the reporting window. Window opens November 1.        | <b>November 30, 2020</b>   | LSEs/EDCs that are responsible to report on NRBTMG located in modeled wholesale area in zone |

- The objective of this session is to educate responsible LSEs/EDCs on the new Non-Retail Behind the Meter Generation (NRBTMG) screens that were recently released to Capacity Exchange.
- NRBTMG screens are to be used by responsible LSEs/EDCs to satisfy their Non-Retail BTMG requirements in Manual 14D, Appendix A: Behind the Meter Generation Business Rules.
- NRBTMG screens are intended to replace the manual submittal of NRBTMG templates to [BTMG@pjm.com](mailto:BTMG@pjm.com).

NRBTMG menu is used to administer the reporting, netting, and operational performance requirements of Non-Retail BTMG that are in Manual 14D, Appendix A.

| Menu Area         | Screen                   | Release Date |
|-------------------|--------------------------|--------------|
| Unit Reporting    | NRBTMG Characteristics   | June 11      |
|                   | Reporting & Confirmation | June 11      |
|                   | Change Request           | Nov 30       |
| Generation Output | Coincident Peak Hours    | June 11      |
|                   | Event Hours              | Nov 30       |
| Outages           | Outages                  | 2021         |
| Performance       | Expected Performance     | Nov 30       |
|                   | Event Performance        | 2021         |
|                   | Netting Reduction        | 2021         |

- LSE account that is assigned the obligation peak load (OPL) value on June 1 of the Delivery Year for the entire modeled wholesale area is responsible to report on Non-Retail BTMG units located in the wholesale area for such Delivery Year.
- EDC account will have the responsibility to report if there are multiple LSEs that serve load in the modeled wholesale area or if there are multiple LSEs that serve load in Rest of Zone area.
  - Rest of Zone area = Transmission zone – modeled wholesale areas in Capacity Exchange

Behind the Meter Generation that is used by municipal electric systems, electric cooperatives, and electric distribution companies to serve load.

Unit delivers energy to load without using the transmission system or any distribution facilities, unless permission to use such distribution facilities is granted from owner, lessee, or operator.

Does not include any portion of the output of such unit that is participating in PJM Markets for the current Delivery Year and is expected to be participating in PJM Markets during coincident peak hours

Does not include a generation facility that is dedicated to a retail end-use program that directly offsets retail charges (e.g., Net Energy Metering, Community Solar, or Aggregate Net Energy Metering)

Future  
Release  
in Nov.

## NRBTMG Characteristics

- View modeled NRBTMG unit characteristic data
  - Static data that is not expected to change each delivery year

## Reporting & Confirmation

- View, modify or confirm specific NRBTMG unit data for a Delivery Year
  - Summer rated ICAP value
  - ICAP MWs in PJM Markets
  - DR Hub registration ID

## Change Request

- Submit “New unit” change request to initiate the modeling of a new unit
- Submit “Existing unit” change request to request modification to previously submitted unit data or submit deactivation date
- View previously submitted change requests

- PJM pre-populated the Capacity Exchange database with NRBTMG unit data submitted to PJM for 2019/2020 Delivery Year via NRBTMG reporting templates.
- Responsible LSE/EDC for a modeled wholesale area in the 2019/2020 Delivery Year can view PJM's record of NRBTMG unit data for units located in such area for 2019/2020 Delivery Year.
- PJM carried over the NRBTMG unit data reported for a modeled wholesale area in the 2019/2020 Delivery Year into the 2020/2021 Delivery Year with the exception of DR Hub Registration ID data and ICAP MW in PJM Markets data.
- Responsible LSE/EDC for a modeled wholesale area in the 2020/2021 Delivery Year must review and confirm NRBTMG unit data for 2020/2021 Delivery Year during the June 15 - July 31, 2020 reporting window.
- For each annual reporting window that opens in June of a Delivery Year, PJM will continue to carry over a wholesale area's NRBTMG unit data reported from the prior delivery year.

Select desired Delivery Year from drop down list.

The definitions for EIA Prime Mover Codes and EIA Primary Energy Source Codes are available in Capacity Exchange User Guide.

## Can I update data on the Characteristics Screen?

- NRBTMG Characteristics screen is a read-only screen.
- Characteristics screen displays NRBTMG unit data by the selected Delivery Year.
- Only the responsible LSE/EDC for the modeled wholesale area for the selected Delivery Year can view the characteristic data for NRBTMG units located in such modeled wholesale area.
- Until the Change Request screen is released into production, a request to update specific data on the Characteristics screen must be submitted by the responsible LSE/EDC to [CapacityExchangeSupport@pjm.com](mailto:CapacityExchangeSupport@pjm.com).

Refresh

Save

**(1) Click on row to highlight the unit row that desire to update.**

**(2) Enter the desired data for the Delivery Year in the editable data fields.**  
After you enter desired data for the highlighted unit, you may click on another unit row and proceed to update data for next selected unit row.

**(3) Click Save button to submit the updates. Reporting Confirmed will automatically change to "Yes" after click Save provided that you actually changed the existing data.**

*Note: If Reporting Confirmed is "Yes", user may still update data in the editable data fields while the reporting window is open.*

## Registration ID

- Enter the registration ID for the current Delivery Year if the unit is included in Pre-Emergency, Emergency, or Economic Load Response registration for such Delivery Year.

## Summer Rated ICAP MW

- Enter the Summer Rated ICAP Value of unit.
  - Represents capability of unit at the expected time of the PJM summer peak.
  - Determined by responsible LSE/EDC applying methodology similar to determining Summer Net Capability for resource type in Manual 21, section 2.

## ICAP MW in PJM Markets

- Enter the amount of ICAP MWs that are participating in PJM Markets for the current Delivery Year (as a Capacity Resource, Energy Resource, or in the Pre-Emergency, Emergency, or Economic Load Response program) and are expected to participate in PJM markets during coincident peak hours.

- At this time, a user may only confirm a single unit row at a time.
- If updates were entered for multiple units and saved, Reporting Confirmed will automatically be “Yes” for the multiple units.
- For LSE/EDCs that have a large number of NRBTMG units to confirm which require no updates, you may submit a request to set the Reporting Confirmed to “Yes” for such NRBTMG units to [CapacityExchangeSupport@pjm.com](mailto:CapacityExchangeSupport@pjm.com).
- Future fix to allow the confirmation of multiple unit rows has been requested.

Keep Reporting Confirmed as "No".

Report new unit(s) or missing unit(s) to PJM.

## How do I report a new unit or a missing unit?

- Until the Change Request screen is released into production, a new unit or a missing unit must be reported to PJM to initiate the modeling of the unit in Capacity Exchange.
- Please complete and submit a NRBTMG reporting template for only the new and/or missing unit(s) to [CapacityExchangeSupport@pjm.com](mailto:CapacityExchangeSupport@pjm.com)
  - <https://www.pjm.com/-/media/markets-ops/rpm/non-retail-behind-the-meter-reporting-template.ashx?la=en>
- PJM will only model a NRBTMG unit that has a nameplate capacity that is equal to or greater than 0.1 MW.
- New unit is to be reported to PJM no later than 31 days after the in-service date.
- PJM's preference is to model a new unit in Capacity Exchange after the unit is actually in-service as opposed to modeling future units.

## Coincident Peak Hours

- Submit and view hourly generation output data during coincident peak hours

## Event Hours

Future  
Release  
in Nov.

- Submit and view hourly generation output data during an Emergency Event that is subject to performance compliance

- PJM pre-populated the Capacity Exchange database with NRBTMG generation output data for the coincident peak hours that occurred during the 11/01/2018-10/31/2019 reporting period and was reported to PJM via NRBTMG generation output templates in November 2019.
- Responsible LSE/EDC for a modeled wholesale area in the 2019/2020 Delivery Year will be able to view PJM's record of generation output data for the 11/01/2018-10/31/2019 reporting period.

- PJM will populate the coincident peak hours used in determining network service peak load (NSPL) values for 2021 calendar year and obligation peak load values (OPL) values for the 2021/2022 Delivery Year by October 31, 2020.
- Coincident Peak Hours Screen will be open to submit generation output data for the 11/01/2019-10/31/2020 reporting period on November 1, 2020 and will close on November 30, 2020.
