- If there are any demonstrations you would like to see please email TechChangeForum@pjm.com
- We will provide October demonstrations on October 20

Product(s)	Date	Issue
<ul style="list-style-type: none"> Data Miner 	<p>September 3</p>	<p>The Real-Time Unverified Five Minute LMPs feed did not post the latest data to Data Miner. PJM addressed this by increasing the cloud resources allocated to the Data Miner application.</p>
<ul style="list-style-type: none"> OASIS ExSchedule 	<p>September 7</p>	<p>The databases for these applications were impacted by disk resource exhaustion. PJM got the databases back and has increased the disk resources to prevent a failure of this kind in the future. PJM has also improved the monitoring for this type of event so it can be addressed sooner.</p>

Product(s)	Date	Issue
<ul style="list-style-type: none"> LMP 	<p>September 8</p>	<p>The RT LMPs were late to post on September 8. PJM and MISO implemented contingency switching at the Greentown substation during the afternoon of September 8, 2020 to alleviate congestion on the Greentown transformer. The switching initially resulted in a price difference between the SOUTHIMP and SOUTHEXP pricing interface p-nodes. The pricing for these interfaces should always be equal and therefore PJM updated the prices during the LMP Verification process. PJM will review and update the definition of these interfaces to ensure they are equal.</p>
