Train Environment

- In alignment with other PJM Tools, a Train environment is being developed to allow users to safely test bug fixes, enhancements and upgrades in an external environment without negatively impacting production operations.

Account Access Assignments in Account Manager

- As part of a remediation effort and in alignment with the other PJM Tools, access to PJM Connect sites will now be managed via Account Manager. PJM will add a new application and access type to all user accounts who have access to a PJM Connect site.

- The process to request a PJM Connect site will remain the same.

- Your CAM will not be able to make changes to this role; PJM Connect administrators will update this assignment as needed.

- Access assignments will be completed by June 30.
