

Additional GENRUNR code for exchange via ICCP

George Chu
Markets Coordination

GENRUNR is a prior-existing data point that acts as a packed-bit map for various reasons to run, sent from PJM to a resource.

- See PJM Manual 14D for existing values and meanings for GENRUNR.
- <https://pjm.com/-/media/markets-ops/ancillary/pjm-genrunr-values.ashx>

Additional GENRUNR Code for Exchange via ICCP
