Clicking the Upgrade ID displays additional project details.

- PJM is currently implementing a Reformed Interconnection Process, which involves transitioning eligible New Service Requests from a serial 'first-come, first-served' queue approach to a 'first-ready, first-served' cycle approach.
- Projects in both formats will be available on PJM.com.
- The initial phase is scheduled for release in May.

The list of projects that moved to Transmission Cycle 1 is now available.

- Activation of the expiration policy for the remaining secure areas will resume in December.

We are working through multiple factors that may contribute to the website delays, specifically:

- Move Search engine to Cloud - March 2023
- Hardware updates –January 2024
- Network adjustments –February 2024
- Refactor PJM.com home page –April 2024
- Move PJM.com and its sub-sites to Cloud – In progress (July 2024)
- Upgrade software to the latest version – In progress (July 2024)
- Refactor code base – In progress (December 2024)
- Measure performance metrics – Ongoing

PJM.com slowness is a long-term initiative with many variables due to the complexity and size of the website.

**Status:**

Page loading speeds continue to improve.

Homepage technology upgrade was completed on April 10

- Scripts written to scrape data from **PJM charts** on the homepage and Markets and Ops page will no longer function.
- The data source for **the charts** on the homepage of [www.pjm.com](http://www.pjm.com) and Markets and Ops page is Data Miner.
- Scripts written to retrieve documents from the website should continue to work.

## After the move to Cloud:

Underlying page technology will be gradually upgraded across the website. The organization of the site will remain the same.
