Releases ◆

FERC 881 ◆

eDART Release (Train & Production: August 6, 2024)

- •Update to the Transmission Facility Outages List to support the Transmission Outage Information Transparency Initiative

    - •Provide a timestamp when a ticket was last evaluated by PJM in the 6 Month Out to 2 Day Out period; or, when the status of the At Risk flag was changed

    - •Include a field to indicate if a transmission outage ticket is considered 'On-Time'

Release Notes   eDART XML Schemas

eDART Release (Train & Production: August 6, 2024)

- • Change to Submit on Time Rules when transmission tickets are un-cancelled

  - • If un-cancelled within the same month of latest cancellation, run the ticket through the Submit on Time rules for ticket revisions.

  - • If un-cancelled after the same month of latest cancellation, follow current process.

Release Notes   eDART XML Schemas

eDART Release (Train & Production: August 6, 2024)

- •Transmission Ticket API Automatic Equipment Selection

  - •Update the transmission ticket API so that when the user submits a ticket without selecting the primary equipment, the system selects the first outaged equipment as the primary equipment.

  - •Change the default value for the NERC TADS Operational and Planned variable to N/A as the current default value of -1

Release Notes   eDART XML Schemas

eDART Release (Train & Production: August 6, 2024)

- eDART enhancement to send email notification of approved restoration plans
  - To be sent at time of approval
  - Recipients will be the eDART black start contacts for TOs who have requested to view the particular approved restoration plan (via the Restoration Plan Notification Request form in eDART).
- Retire current manual process
