January 19, 2021
2:30 p.m. – 4:30 p.m. ET**

Administration (2:30 – 2:35)

1. Scott Baker opened the meeting and reviewed the agenda.
2. Hamad Ahmed reviewed the meeting participation guidelines.

Order 2222 – Distribution Company Coordination (2:35 – 4:25)

3. PJM Staff continued to review initial thoughts on FERC order no. 2222 regarding the compliance directives associated with RTO and distribution utility coordination.
 - PJM Staff discussed additional rationale and timing details associated with their initial thinking on how to coordinate operations of DER aggregations between the RTO, the distribution utility, and the DER aggregator. As background for some of the timing provisions associated with the proposed timing windows, PJM reviewed how the near term reliability studies, specifically 3-day out, 2-day out and day-ahead study processes, are conducted. PJM staff also discussed the current PJM markets timelines and acquired stakeholder feedback on the various coordination steps proposed.
 - Staff and stakeholders also discussed how the utility override process may work, and the distribution reliability criteria that will be needed to support that process.

Action items and next meeting agenda (4:25 – 4:30)

4. The facilitation team reviewed action items from the meeting and took requests for future agenda items. The next EDC workshop will likely focus on the provisions of the Utility Review Process laid out in Order 2222.
