

**Resource Adequacy Analysis Subcommittee
PJM Conference and Training Center/ WebEx
July 30, 2020
8:00 a.m. – 9:00 a.m. EPT**

Administration

1. Mr. Falin opened the meeting and reviewed the agenda. The meeting minutes from the June 6, 2020 meeting were approved and will be posted as final.

2020 Load Model Time Period Assessment

2. Mr. Rocha-Garrido reviewed detailed results of analysis performed by PJM staff regarding the selection of a load model time period for both PJM and the World regions. The analysis focused on the 2024/2025 Delivery Year and followed the procedure approved by the Planning Committee at its July, 2009 meeting. PJM recommended a 13 year load model based on the years 2002-2014 for use in the 2020 RRS Base Case.

PJM also recommended that the World peak be switched to a different July week so that PJM and World peak on the same month but not on the same week.

Following discussion, the RAAS endorsed the 2002-2014 load model for use in the 2020 RRS Base Case.
