Intended Audience: OC, RSCS, SOS-G, and SOS-T Members:

In anticipation of winter 2023/24, PJM and PJM stakeholders are taking various steps to prepare for reliable operations. PJM recommends that resource owners have sufficient fuel, supplies, and winterization steps to be ready to operate for several weeks under adverse winter conditions.

As announced at recent PJM stakeholder meetings, PJM issued a new eDART Generation Owner data request on October 28, 2023, in accordance with PJM Manual 14-D, Generator Operational Requirements, Section 7.3.5 Fuel and Emissions Reporting, with a focus on Generator Fuel Inventory and Emissions updates for the upcoming 2023/2024 winter season. This is <u>in addition to</u> the Generation Resource Cold Weather Checklist data request issued today, 11/1.

This annual fuel inventory and emissions data request for all fossil-fueled resources data request is **<u>mandatory</u>**, and is required for reliable operations planning purposes and enhanced PJM situational awareness. This data request is different from the weekly fuel inventory and supply data request which has not been implemented at this time.

PJM requires that Generation Owners and/or Market Participants complete the data request no later than **23:59 EPT on December 1, 2023**. Failure to comply with this Seasonal Fuel Inventory and Emissions Data Request may result in potential referral to FERC Office of Enforcement, and is potentially actionable as a violation of the Tariff, the applicable ISA, and/or Operating Agreement section 11.3.1.

As noted above, the data request is mandatory for all Generation Owners and Market Participants, and the obligation to respond is not excused even if a third party asset manager or other third party contractor is responsible for fuel procurement.

Please note that PJM will share all data request responses with its independent market monitor, Monitoring Analytics, LLC. In addition, data responses could be requested by regulators and PJM would share with member notice only in accordance with the PJM Operating Agreement, section 18.17.

This data request must be submitted through the eDART web forms or via eDART TXT file upload, and cannot be submitted via email. Where possible, the data request has been pre-populated with member responses from last year, except in a few instances where there was a change in unit ownership or modeling. All Generation Owners must fill in responses to questions that were not pre-populated and review the responses that were pre-populated to ensure that they are still accurate. A copy of the questions and instructions are attached for quick reference.

Questions pertaining to the eDART GO Fuel Inventory and Emissions Data Request can be sent via email to edartgosurvey@pjm.com or by phone at (610) 666-2282.
