Subcommittee

STANDARD:
EOP-012

[Project 2021-07](#) Extreme Cold Weather Grid Operations, Preparedness, and Coordination Phase II

PROJECT BACKGROUND:

Third draft of EOP-012-2 Extreme Cold Weather Preparedness and Operations

Background: To address the recommendations (1a, 1b, 1c, 1g, 1h, and 1i) for new or enhanced Standards proposed by the *Joint Inquiry Report* (Feb. 2021 Winter Storm Uri) as well as the FERC directives in the February 2023 order approving Phase I standards EOP-011-3 and EOP-012-1.

**STANDARD:
PRC-006**

Reliability and Security Technical Committee (RSTC) proposed Standard Authorization Request (SAR) Clarity of the Imbalance Equation in PRC-006

PROJECT BACKGROUND:

This project is designed to reduce the risk associated with different interpretations of the imbalance equation in PRC-006-3. Certain interpretations can lead to significant risks in the design of the UFLS program under high Distributed Energy Resources (DER) penetrations. The project also aims to minimize the risk of DER tripping causing adjacent Under Frequency Load Shedding (UFLS) relay action on armed feeders. This can be achieved by adopting consistent modeling practices, similar to other stability depictions, for the UFLS database.
