## Purpose of this Document

Per the charter for the Financial Risk Mitigation Senior Task Force (FRMSTF), PJM has undertaken to “provide an initial proposal(s) informed by stakeholder feedback and expert consultation” in each of four key work areas.

We believe this should be addressed in the same manner as a formal market design process. Many of these areas are complex, and in some areas substantial analysis will be required before a formal proposal can be made. However, there will often be points in the interim where it will be useful to both parties to share analysis results or a discussion paper, and gather feedback. It will also help to generate confidence by demonstrating steady progress towards an end outcome

This document describes the key publications this project intends to provide to the FRMSTF, and their proposed timing. It is presently a ‘strawman’, as some elements of the plan are still coming together. Should the sequence need to change, we ask for your forbearance, and undertake to communicate any change promptly.
