

Officer Certification for Unit Specific MSOC Under OATT Attachment DD 6.7 and 6.8

I, [insert name], [insert title], of [insert company], as an officer of the Capacity Market Seller, DO HEREBY SWEAR AND CERTIFY in further support of [project or resource name] unit-specific Market Seller Offer Cap request dated [insert date] as follows:

The claimed costs and revenue projections supporting this unit-specific request accurately reflect, in all material respects, the unit's actual Avoidable Cost Rate for the Generation Capacity Resource that is the subject of a Sell Offer and that any variable costs that are directly attributable to the production of energy are excluded in this unit-specific ACR.¹

To the extent, a Capacity Performance Quantifiable Risk ("CPQR") is included, it consists of the quantifiable and reasonably-supported costs of mitigating the risks of non-performance associated with submission of a Capacity Performance Resource offer for the resource specified in this officer certification. The Seller further certifies that the supporting documentation that is submitted in the MIRA system in support of the requested CPQR for this resource identifies only the risks the seller faces from committing a Capacity Resource and is used to quantify the costs of mitigating such risks.

To the extent, an Avoidable Project Investment Recovery (APIR) Rate is included, the Capacity Market Seller certifies that it intends to make the project investments included in the submitted APIR Rate and submitted evidence of corporate commitment to the MIRA system.

I, as the certifying officer, have personal knowledge of the unit-specific Market Seller Offer Cap request and that to the best of my knowledge and belief: (1) the information supplied to the Market Monitoring Unit and the Office of Interconnection to support this request is true and correct; (2) the Capacity Market Seller has disclosed all material facts relevant to the request; and (3) the request satisfies the criteria for a unit specific Market Seller Offer Cap.

I acknowledge that failure to comply with the PJM tariff, or making incorrect statements herein, may result in a referral to the IMM and/or the FERC Office of Enforcement.
