Re: Deactivation Notice per PJM Open Access Transmission Tariff Section 113.1

Dear PJM Generation Manager:

Pursuant to Section 113.1 of the PJM Interconnection L.L.C. (“PJM”) Open Access Transmission Tariff, MRP Elgin LLC (“MRP Elgin”) hereby respectfully provides notice to PJM of its intent to deactivate and retire all four units (CT01, CT02, CT03 and CT04) at the Elgin Energy Center (the “Units”) in Elgin, Illinois, as of June 1, 2025. The Units are natural gas-fired combustion turbines. The Units have capacity commitments through May 31, 2024, and none of them is designated as a “black start” unit.

MRP Elgin is planning to retire the Units as of June 1, 2025 in light of PJM market conditions and operating restrictions imposed by the stringent emissions limits under the Illinois Climate and Equitable Jobs Act. Given these circumstances, continued operation of the Units is expected to be uneconomic relative to other opportunities.

Please let me know if you have any questions or would like to discuss the deactivation of the Units.

Respectfully Submitted,

Brant Yung  
Vice President  
MRP Elgin LLC
